El Toro Water District Hosts an Open House to Share Information about the Recycled Water Expansion Project

Lake Forest, CA – Join El Toro Water District for an educational Open House and learn more about the District's comprehensive, multi-phase Recycled Water Expansion Project which will begin in January/February 2013.

Wednesday, November 28, 2012

3:00 p.m. to 6:00 p.m.

Laguna Woods Village Community Center – Pine Room

24351 El Toro Road, Laguna Woods

The Recycled Water Expansion Project will enhance local water supplies and reliability, reduce dependence on imported water and expand recycled water deliveries to meet future customer demand. There are two components of the project:

- The District will expand its existing Water Recycling Plant to allow for the treatment and delivery of additional recycled water.
- Simultaneously, the District will construct approximately 100,000 feet or 19 miles of recycled water pipeline beneath the roadways in Laguna Woods and the northwest portion of Laguna Hills.

The Open House will feature a variety of stations which will allow residents to learn about the entire project as well as specific project details. Light refreshments will be served.

Please contact Sherri Seitz at sseitz@etwd.com or 949.837.7050, extension 239 to RSVP.

###

The mission of the El Toro Water District is to provide its customers a safe, adequate and reliable supply of water and wastewater service in an environmentally and economically responsible way.
